

U. S. PTO Customer No. 25280

Case #2013D

CLAIM AMENDMENTS:

Claims 1-67 (Canceled)

68. (Currently Amended): An airbag, comprising:

a face panel section having four boundary edges, said four boundary edges being at right angles with respect to each other so that said face panel section has a substantially rectangular shape;

a first body panel section having plural boundary edges; and

a second body panel section having plural boundary edges,

at least one boundary edge of said plural boundary edges of said first body panel section being joined at seams to three boundary edges of said four boundary edges of said face panel section and one boundary edge of said plural boundary edges of said second body panel section being joined at seams to one boundary edge of said four boundary edges of said face panel section, at least one of said plural boundary edges of said ~~first and~~ first body panel section and at least one of said plural boundary edges of said second body panel section panel section being joined together at seams seamed together so that said face panel section and said first and said second body panel sections, so joined, form an inflatable airbag.

69. (Previously Presented): The airbag as recited in claim 68, wherein said face panel section further comprises at least one face panel.

U. S. PTO Customer No. 25280

Case #2013D

70. (Previously Presented): The airbag as recited in claim 68, wherein said first body panel section further comprises at least one first body panel.

71. (Previously Presented): The airbag as recited in claim 68, wherein said second body panel section further comprises at least one second body panel.

72. (Previously Presented): The airbag as recited in claim 68, wherein said plural boundary edges of said first body panel section are substantially straight.

73. (Previously Presented): The airbag as recited in claim 68, wherein said plural boundary edges of said second body panel section are substantially straight.

74. (Previously Presented): The airbag as recited in claim 68, wherein said face panel section further comprises two face panels joined together along a seam.

75. (Currently Amended): The airbag as recited in claim 74, wherein said seam joining said face panels is a straight seam.

76. (Previously Presented): The airbag as recited in claim 68, wherein said rectangular shape is a square shape.
